

CHIR99021

Catalog Number: ST10005

Size	430 μ L
Concentration	10 mM in DMSO
Description	CHIR99021 is the most widely used, potent and selective inhibitor of glycogen synthase kinase 3 (GSK-3), inhibiting GSK-3 β (IC ₅₀ = 6.7 nM) and GSK-3 α (IC ₅₀ = 10 nM). It exhibits greater than 500-fold selectivity for GSK-3 over closely related kinases. CHIR99021 has been shown to enhance the reprogramming of murine and human somatic cells into iPSCs, potentially promote expansion of embryonic stem cells and tissue-specific adult stem cells, and induce differentiation of human ESCs/iPSCs toward neural or mesendoderm lineages under appropriate conditions.
Molecular Weight	465.34
Molecular Formula	C ₂₂ H ₁₈ Cl ₂ N ₈
Chemical Name	6-[2-[4-(2,4-Dichlorophenyl)-5-(4-methyl-1H-imidazol-2-yl)pyrimidin-2-ylamino]ethylamino]pyridine-3-carbonitrile
CAS Number	252917-06-9
PubChem Identifier	9956119
Appearance	Colorless liquid
Purity	>97% by HPLC analysis
Formulation	2 mg CHIR99021 in 430 μ L of DMSO, filter sterilized
Recommended Usage	Aliquoting the stock solution is recommended to avoid repetitive freeze-thaw cycles. For use in cell culture, media should be warmed prior to adding the reconstituted compound. Note: for most cells, the maximum tolerance to DMSO is less than 0.5%.
Storage and Stability	Store at -20°C. Stable for 6 months when stored as directed. Avoid repeated freeze-thaw cycles.
